Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Mapping out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions	Customer submits a credit card application by entering personal and financial information	The ML model evaluates customer data and predicts the possibility of approval	Customer gets the final approval or rejection status
Touchpoint	Online banking portal / Bank mobile application	Automated credit evaluation system	SMS / Email alerts / Banking portal
Customer Thought	"I hope my information meets the eligibility requirements."."	"I am curious about my approval chances based on my details."	"I want to know the final decision and the reason behind it."
Customer Feeling	Worried and unsure while applying for the card.	Waiting with curiosity and concern about the result.	Satisfied after approval or disappointed after rejection.
Process Ownership	Application Management Team	Machine Learning and Risk Analysis Team	Banking Decision and Support Team
Improvement Opportunities	Provide a simple application process with clear eligibility information.	Improve prediction accuracy and reduce evaluation time	Provide faster results with clear approval/rejection explanations.
